3 Magnificent ROSES

These three new patented varieties being grown by us are being offered in the following collection:

WARRAWEE. Plant Patent No. 140. Of sturdy Radiance growth and light pink color.

FEU PERNET-DUCHER. Plant Patent No. 103. Wonderful bushy habit of growth, bearing large, wonderful blossoms of light yellow color, deepening at the center.

MME. COCHET-COCHET. Plant Patent No. 129. Good strong bushes with numerous shrimp-pink blooms.

ONE EACH OF THESE 3 ROSES
for \$3.³⁵

SHIRLEY TEMPLE

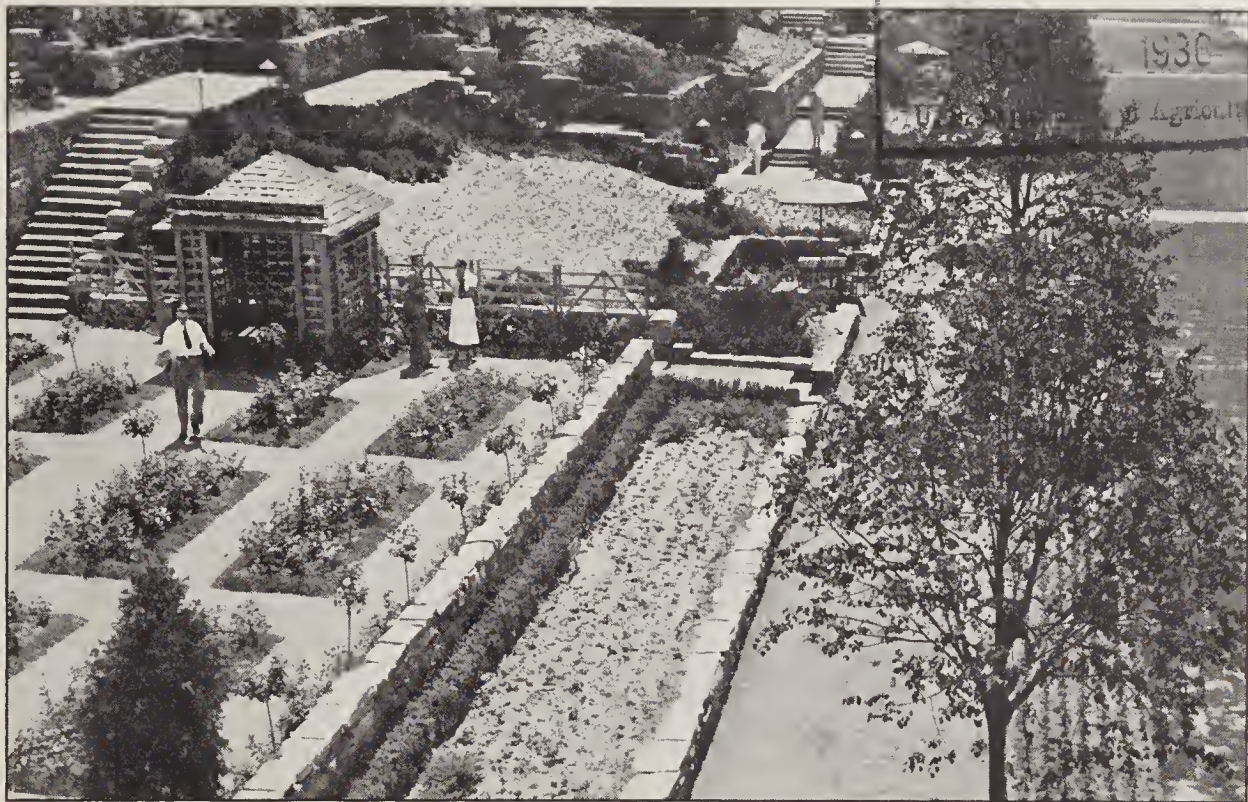

The Captivating

SHIRLEY TEMPLE ROSE

This is the Rose which was named last year through a national contest conducted by us. Besides being the most appropriate name for the new Rose, as selected by the judges, it was also the name sent in the greatest number of times. Eleven prizes, each consisting of a dozen Roses plus the new Rose, were sent to those who suggested that name.

The Shirley Temple Rose, a monthly bloomer, is a good grower producing flowers singly on long cutting stems. The blossom is light yellow, of pleasing form, and is composed of 35 petals which come out a lemon-yellow color, gradually turning lighter. Like its namesake, it is charming and attractive.

\$1.50 each; 3 for \$3.50

Wyant Rose-Garden at Cleveland Centennial Exposition

Plant Wyant Roses This Fall

THE BEST TIME TO PLANT IS IN THE FALL AND
THE BEST ROSES TO PLANT ARE WYANT ROSES

It has been proved by thousands of my customers that from about October 20 to November 20 in this latitude is the perfect time to plant Wyant Roses. There is less danger of losing the Roses if they are planted at this time than if they are planted in the spring, provided the simple planting directions enclosed with each order are followed. The soil and weather conditions are much more favorable and you get the selection you want with better bushes, in the fall, than you do in the spring. Bushes planted in the fall grow and bloom much better the following season than those set in the spring. There is every reason for fall planting.

Wyant Roses are the height of quality; there are no better Roses grown than these. They are grown by a specialist whose entire thought and energy is devoted to raising high-quality Roses. The bushes are grown at Mentor where the rugged climate helps to produce hardier Roses. Part of the Roses are budded on seedlings and part on cuttings, and both types of roots are fine branched and well formed. Many of the patented varieties are now produced in our own nurseries so that you are assured of receiving quality in those as well as the old standard kinds. Order now for fall planting. Price list is enclosed.
